

Resource Capital Corp. Announces Fourth Quarter and Year Ended 2007 Operating Results

NEW YORK, NY, Mar 13, 2008 (MARKET WIRE via COMTEX News Network) -- Resource Capital Corp. (NYSE: RSO) ("RCC" or the "Company"), a real estate investment trust whose investment strategy focuses on commercial real estate loan assets and, to a lesser extent, commercial finance assets, reported results for the fourth quarter and year ended December 31, 2007.

Financial Summary

- RCC reported REIT taxable income, a non-GAAP measure, of \$11.4 million, or \$0.46 per share-diluted for the quarter ended December 31, 2007.
- RCC reported adjusted net income, a non-GAAP measure excluding the effect of non-cash charges, of \$10.7 million, or \$0.43 per share-diluted for the quarter ended December 31, 2007.
- Dividend distribution of \$0.41 per share for the quarter ended December 31, 2007, up 8% from the fourth quarter of 2006 and unchanged from the third quarter. RCC declared and paid dividends of \$1.62 per common share, for total dividends paid of \$40.7 million (96% of estimated REIT taxable income) for the year ended December 31, 2007.
- RCC announced a dividend distribution of \$0.41 per common share for the quarter ended March 31, 2008, unchanged from the quarter ended December 31, 2007 and an increase of \$0.02 per common share (5%) from the quarter ended March 31, 2007.
- Economic book value, a non-GAAP measure, was \$12.25 per common share as of December 31, 2007.
- GAAP book value was \$10.82 per common share as of December 31, 2007.
- REIT taxable income, a non-GAAP measure, of \$42.4 million or \$1.71 per share-diluted for the year ended December 31, 2007 as compared to \$27.9 million or \$1.57 per share-diluted for the year ended December 31, 2006, an increase of \$14.5 million (52%) and \$0.14 per share-diluted (9%), respectively.
- RCC reported adjusted net income, a non-GAAP measure, excluding the effect of asset impairments and other non-cash charges, of \$42.7 million, or \$1.72 per share-diluted for the year ended December 31, 2007.
- RCC reported GAAP net income of \$0.14 per share-diluted for the quarter ended December 31, 2007.
- Paydowns on RCC's bank loan portfolio were \$44.0 million for the quarter ended December 31, 2007, and \$310.1 million for the year ended December 31, 2007. Payoffs on RCC's commercial real estate loan portfolio were \$74.9 million for the quarter ended December 31, 2007, and \$249.1 million for the year ended December 31, 2007.

Jonathan Cohen, CEO and President of RCC, commented, "It is an understatement to say that the second half of 2007 presented unparalleled disruptions in the financial markets in the United States and abroad, and this has affected every class of financial asset, principally and most dramatically in the sub-prime mortgage market of the United States. Despite these challenges, we performed well in 2007, generating \$1.71 of estimated REIT taxable income, a non-GAAP measure, and distributing \$1.62 to RCC's shareholders, consistent with RCC's guidance of \$1.60 to \$1.65. RCC completed its conversion from investing primarily in purchased interests in subordinate commercial real estate loans to being an originator of senior secured whole loans and bank loans. During the fourth quarter, we deconsolidated a VIE and its related ABS-RMBS exposure and as of February 2008, RCC's investment in this VIE has been reduced to \$0. RCC is positioned to benefit from its

match-funded vehicles that have a relatively low cost of funds. RCC wants to emphasize that, despite the market disruptions, its assets continue to perform well as it endeavors to maintain franchise value and its dividend payout in 2008."

The following schedules of reconciliations as of December 31, 2007 are included in this release:

- Schedule I - GAAP Net Income to Adjusted Net Income;
- Schedule II - GAAP Net Income to Estimated REIT Taxable Income; and
- Schedule III - GAAP Stockholders' Equity to Economic Book Value.

For the quarter ended December 31, 2007, RCC reported adjusted net income, a non-GAAP measure excluding the effect of non-cash charges, of \$10.7 million, or \$0.43 per share-diluted, compared to \$6.8 million, or \$0.36 per share-diluted for the fourth quarter of 2006. For the year ended December 31, 2007, RCC reported adjusted net income, excluding the effect of asset impairments and other non-cash charges, of \$42.7 million, or \$1.72 per share-diluted as compared to adjusted net income, excluding the effect of the net realized loss from the sale of agency RMBS portfolio, of \$24.4 million, or \$1.36 per share-diluted for the same period in 2006. For the fourth quarter ended December 31, 2007, RCC reported GAAP net income of \$3.5 million, or \$0.14 per share-diluted, as compared to GAAP net income of \$6.8 million, or \$0.36 per share-diluted for the fourth quarter of 2006. RCC reported GAAP net income for the year ended December 31, 2007 of \$8.9 million, or \$0.36 per share-diluted, as compared to GAAP net income for the year ended December 31, 2006 of \$15.6 million, or \$0.87 per share-diluted.

Book Value

As of December 31, 2007, RCC's GAAP book value per common was \$10.82. Total stockholders' equity was \$271.6 million as of December 31, 2007 as compared to \$317.6 million as of December 31, 2006. Total common shares outstanding were 25,103,532 as of December 31, 2007 as compared to 23,821,434 as of December 31, 2006.

As of December 31, 2007, RCC's economic book value per common share outstanding, a non-GAAP measure, was \$12.25. Economic book value is computed by adding back to GAAP book value any unrealized losses on the Company's investments in CMBS for which it expects to recover full par value at maturity, and on derivatives (cash flow hedges) that are associated with fixed-rate loans which it intends to hold until maturity, in excess of its value at risk, and that have not been adjusted through stockholders' equity for market fluctuations (see Footnote 1 of Schedule III). Economic book value per share is computed by dividing the economic book value by the number of shares outstanding at the end of the period.

Additional financial results for the fourth quarter and year ended December 31, 2007 and recent developments include:

General

- RCC's net interest income increased by \$4.0 million, or 40%, to \$14.1 million for the fourth quarter ended December 31, 2007, as compared to \$10.1 million for the same period in 2006. RCC's net interest income increased by \$20.2 million, or 6%, to \$55.4 million for the year ended December 31, 2007, as compared to \$35.2 million for the same period in 2006.
- RCC's total assets grew by \$269.3 million for the year ended December 31, 2007, primarily in commercial real estate and commercial finance assets, as described below.

Commercial Real Estate

- RCC produced new commercial real estate ("CRE") loans, on a gross basis, of \$72.8 million during the fourth quarter ended December 31, 2007. The aggregate net portfolio of CRE loans grew by \$246.8 million to \$902.9 million at December 31, 2007, from \$656.1 million at December 31, 2006, not including future funding obligations of \$11.3 million.

The following table summarizes RCC's CRE loan origination activities and future funding obligations, at par, for the three, six and 12 months ended December 31, 2007 (in millions, except percentages):

- (3) Estimated fair value includes a \$0.3 million provision for lease losses at December 31, 2007.

Liquidity

At March 5, 2008, RCC's liquidity consists of three primary sources:

- cash and cash equivalents of \$11.7 million, \$6.9 million of restricted

- cash in margin call accounts and \$3.4 million of restricted cash related to its leasing portfolio;
- capital available for reinvestment in its five collateralized debt obligation ("CDO") entities of \$75.1 million, which is made up of \$45.0 million of restricted cash and \$30.1 million of availability to finance future funding commitments on commercial real estate loans;
- financing available under existing borrowing facilities of \$14.8 million, comprised of \$5.6 million of available cash from RCC's three year non-recourse secured financing facility and \$9.2 million of unused capacity under its unsecured revolving credit facility. RCC also has \$227.9 million of unused capacity under its repurchase facilities which, however, require approval of individual repurchase transactions by the repurchase counterparties.

Capital Allocation

As of December 31, 2007, RCC had allocated its equity capital among its targeted asset classes as follows: 74.9% in commercial real estate loans, 24.1% in commercial bank loans and 1.0% in direct financing leases and notes.

About Resource Capital Corp.

RCC is a diversified real estate finance company that qualifies as a real estate investment trust, or REIT, for federal income tax purposes. RCC's investment strategy focuses on commercial real estate-related assets, and, to a lesser extent, commercial finance assets. (1) Non-cash charges for loan and lease losses

(2) Net realized loss related to the deconsolidation of a VIE is made up of a gain of \$14.3 million related to the deconsolidation of Ischus CDO II, offset by a \$15.6 million adjustment related to the write-down of RCC's investment in Ischus CDO II. The adjustment of RCC's investment is calculated as \$27.0 million original investment less \$10.7 million in accumulated distributions less the \$0.7 million estimated fair value of the investment at the time of deconsolidation.

(3) During 2007, RCC began evaluating its performance based on several performance measures, including adjusted net income in addition to net income. Adjusted net income represents net income available to common shares, computed in accordance with GAAP, before provision for loan and lease losses, net loss on deconsolidation of VIEs, asset impairments and net loss from sale of agency RMBS portfolio. These items are recorded in accordance with GAAP and are typically non-cash items that do not impact RCC's operating performance or ability to pay a dividend.

Management views adjusted net income as a useful and appropriate supplement to GAAP net income (loss) because it helps us evaluate RCC's performance without the effects of certain GAAP adjustments that may not have a direct financial impact on RCC's current operating performance and dividend paying ability. Management uses adjusted net income to evaluate the performance of RCC's investment portfolios, ability to

manage its expenses and the dividend paying ability before the impact of non-cash adjustments recorded in accordance with GAAP. RCC believes this is a useful performance measure for investors to evaluate these aspects of RCC's business as well. The most significant adjustments RCC excludes in determining adjusted earnings are its provision for loan and lease losses, asset impairments and net loss from the sale of agency RMBS portfolio. Management excludes all such items from its calculation of adjusted net income because these items are not economic charges or losses which would impact RCC's current operating performance. However, by excluding these significant items, adjusted net income reduces an investor's understanding of RCC's operating performance by excluding: (i) management's expectation of possible losses from RCC's investment portfolio, and (iii) the net loss from exiting the agency RMBS market. Adjusted net income, as a non-GAAP financial measurement, does not purport to be an alternative to GAAP net income (loss), or a measure of operating performance or cash flows from operating activities determined in accordance with GAAP as a measure of liquidity. Instead, adjusted net income should be reviewed in connection with net income (loss) and cash flows from operating, investing and financing activities in RCC's consolidated financial statements to help analyze management's expectation of potential future losses from RCC's investment portfolio and other non-cash matters that impact its financial results. Adjusted net income and other supplemental performance measures are defined in various ways throughout the REIT industry. Investors should consider these differences when comparing RCC's adjusted net income to these other REITs.

Estimated REIT taxable income	\$ 11,359	\$ 4,397	\$ 42,410	\$ 27,938
Amounts per share - diluted	\$ 0.46	\$ 0.23	\$ 1.71	\$ 1.57

(1) RCC believes that a presentation of estimated REIT taxable income provides useful information to investors regarding its financial condition and results of operations as this measurement is used to determine the amount of dividends that RCC is required to declare to its stockholders in order to maintain its status as a REIT for federal income tax purposes. Since RCC, as a REIT, expects to make distributions based on taxable income, RCC expects that its distributions may at times be more or less than its reported income. Total taxable income is the aggregate amount of

taxable income generated by RCC and by its domestic and foreign taxable REIT subsidiaries. Estimated REIT taxable income excludes the undistributed taxable income of RCC's domestic taxable REIT subsidiary, if any such income exists, which is not included in REIT taxable income until distributed to RCC. There is no requirement that RCC's domestic taxable REIT subsidiary distribute its income to RCC. Estimated REIT taxable income, however, includes the taxable income of RCC's foreign taxable REIT subsidiaries because RCC generally will be required to recognize and report their taxable income on a current basis. Because not all companies use identical calculations, this presentation of estimated REIT taxable income may not be comparable to other similarly-titled measures of other companies.

SCHEDULE III

RESOURCE CAPITAL CORP. AND SUBSIDIARIES RECONCILIATION OF GAAP STOCKHOLDERS' EQUITY TO ECONOMIC BOOK VALUE (1) (2) (in thousands, except per share data) (Unaudited)

	As of December 31, 2007
Stockholders' equity - GAAP	\$ 271,606
Add:	
Unrealized losses - CMBS portfolio	17,810
Unrealized losses recognized in excess of value at risk - interest rate swaps	18,040
Economic book value	\$ 307,456
Shares outstanding as of December 31, 2007	25,103,532
Economic book value per share	\$ 12.25

(1) Management views economic book value, a non-GAAP measure, as a useful and appropriate supplement to GAAP stockholders' equity and book value per share. The measure serves as an additional measure of RCC's value because it facilitates evaluation of us without the effects of unrealized losses on investments for which we expect to recover full par value at maturity and on interest rate swaps, which we intend to hold to maturity, in excess of RCC's value at risk. Unrealized losses recognized in RCC's financial statements, prepared in accordance with GAAP, that are in excess of RCC's maximum value at risk are added back to stockholders' equity in arriving at economic book value. Economic book value should be reviewed in connection with GAAP stockholders' equity as set forth in RCC's consolidated balance sheets, to help analyze RCC's value to investors. Economic book value is defined in various ways throughout the REIT industry. Investors should consider these differences when comparing RCC's economic book value to that of other REITs.

(2) RCC adds back unrealized losses on interest rate swaps (cash flow hedges) that are associated with fixed-rate loans that have not been adjusted through stockholders' equity for market fluctuations.
