Jonathan Cohen, CEO and President of RCC, commented, "Although these are very tough times in the real estate business, we are content overall with our portfolio. We have been able to (i) buy down our basis through purchases of our CDO bonds at significant discounts, (ii) purchase CMBS AAA rated bonds cheaply where we expect par recoveries, (iii) continue to pay a meaningful cash dividend, and (iv) position ourselves to build value in our portfolio. All this being said, we are continuing to asset manage our portfolio aggressively -- make long term smart decisions and continue to look for opportunistic situations."

Additional financial results for the third quarter ended September 30, 2009 and recent developments include:

General

- RCC's net interest income decreased by \$351,000, or (3%), to \$13.3 million for the three months ended September 30, 2009, as compared to \$13.6 million for the same period in 2008.

Commercial Real Estate

- RCC funded commitments on existing CRE loans on a gross basis of \$4.1 million during the three months ended September 30, 2009.
- RCC bought commercial mortgage-backed securities ("CMBS") of \$34.5 million par value, for a weighted average price of \$58.42 during the third quarter ended September 30, 2009. The net discount of \$14.3 million improved the collateralization on its CRE collateralized debt obligations ("CDO") and these purchases provide a yield of approximately 9.8%.

The following table summarizes RCC's CRE loan origination activities and future funding obligations, at par, for the three, nine and 12 months ended September 30, 2009 (in millions, except percentages):

	Three Months Ended September 30, 2009	Nine Months Ended September 30, 2009	12 Months Ended September 30, 2009	Floating Weighted Average Spread (1)	Weighted Average Fixed Rate (2)

(1) Represents the weighted average rate above the London Interbank Offered Rate ("LIBOR") on loans whose interest rate is based on LIBOR as of

September 30, 2009.

(2) Reflects rates on RCC's portfolio balance as of September 30, 2009.

(3) Includes fundings of previous commitments on transitional loans of \$4.1 million for the three months ended September 30, 2009, \$11.3 million for the nine months ended September 30, 2009 and \$16.8 million for the 12 months ended September 30, 2009.

(4) The basis of new net loans does not include provisions for losses on CRE loans of \$4.2 million for the three months ended September 30, 2009, \$18.3 million for the nine months ended September 30, 2009 and \$18.7 million for the 12 months ended September 30, 2009.

Commercial Finance

-- RCC's bank loan portfolio ended the third quarter with total investments of \$910.6 million, at amortized cost, with a weighted-average spread of one-month and three-month LIBOR plus 2.59%. All of RCC's bank loan portfolio is match-funded through three collateralized loan obligation ("CLO") issuances with a weighted-average cost of three-month LIBOR plus 0.47%. During the three months ended September 30, 2009, RCC received \$55.1 million in bank loan paydowns and repayments. At September 30, 2009, RCC had \$37.0 million of cash available for reinvestment in its three bank CLOs combined.

Book Value

As of September 30, 2009, RCC's GAAP book value per common share was \$6.80. Total stockholders' equity was \$169.4 million as of September 30, 2009 as compared to \$186.3 million as of December 31, 2008. Total common shares outstanding were 24,895,409 as of September 30, 2009 as compared to 25,344,867 as of December 31, 2008. The net decrease in RCC's stockholders' equity of \$16.9 million was primarily the result of increased provisions for loan and lease losses of \$32.6 million, losses on RCC's bank loan portfolio of \$12.6 million, combined with a decrease in the value of marked-to-market securities of \$9.4 million, which was partially offset by an increase in the value of interest rate swaps of \$16.2 million and a gain on the extinguishment of debt of \$19.6 million.

As of September 30, 2009, RCC's economic book value per share, a non-GAAP measure, was \$9.47. Economic book value is computed by adding back to GAAP book value any unrealized losses on the Company's investments in CMBS for which it expects to recover full par value at maturity, and on derivatives (cash flow hedges) that are associated with fixed-rate loans which it intends to hold until maturity, in excess of its value at risk, and that have not been adjusted through stockholders' equity for market fluctuations (see Note 1 of Schedule II in this release). Economic book value per share is computed by dividing the economic book value by the number of shares outstanding at the end of the period.

Investment Portfolio

The table below summarizes the amortized cost and net carrying amount of RCC's investment portfolio as of September 30, 2009, classified by interest rate type. The following table includes both (i) the amortized cost of RCC's investment portfolio and the related dollar price, which is computed by dividing amortized cost by par amount, and (ii) the net carrying amount of RCC's investment portfolio and the related dollar price, which is computed by dividing the net carrying amount by par amount (in thousands, except percentages):

- capital available for reinvestment in its five CDO entities of \$59.5 million, of which \$3.0 million is designated to finance future funding commitments on CRE loans.

Capital Allocation

As of September 30, 2009, RCC had allocated its equity capital among its targeted asset classes as follows: 72% in CRE loans, 27% in commercial bank loans and 1% in direct financing leases and notes.

The following schedules of reconciliations as of September 30, 2009 are included in this release:

TO ESTIMATED REIT TAXABLE INCOME (1)

RCC calculates estimated REIT taxable income, which is a non-GAAP financial measure, according to the requirements of the Internal Revenue Code. The following table reconciles net income (loss) to estimated REIT taxable income for the periods presented (in thousands, except per share data):

(1) RCC believes that a presentation of estimated REIT taxable income provides useful information to investors regarding its financial condition and results of operations as it uses this measurement to determine the amount of dividends that it is required to declare to its stockholders in order to maintain its status as a REIT for federal income tax purposes. Since RCC, as a REIT, expects to make distributions based on taxable earnings, RCC expects that its distributions may at times be more or less than its reported GAAP earnings. Total taxable income is the aggregate amount of taxable income generated by RCC and by its domestic and foreign taxable REIT subsidiaries. Estimated REIT taxable income excludes the undistributed taxable income of RCC's domestic taxable REIT subsidiary ("TRS"), if any such income exists, which is not included in REIT taxable income until distributed to RCC. There is no requirement that RCC's domestic TRS distribute its earnings to RCC. Estimated REIT taxable income, however, includes the taxable income of RCC's foreign TRSs because RCC will generally be required to recognize and report their taxable income on a current basis. Because not all companies use identical calculations, this presentation of estimated REIT taxable income may not be comparable to other similarly-titled measures of other companies.

(2) Denominator for the nine months ended September 30, 2009 includes 88,147 common shares that were not included in the calculation of GAAP earnings per share because the effect would have been anti-dilutive due to RCC's net loss for the nine months ended September 30, 2009. The dilutive shares relate to restricted stock that has not yet vested at September 30, 2009.

SCHEDULE II

RESOURCE CAPITAL CORP. AND SUBSIDIARIES
RECONCILIATION OF GAAP STOCKHOLDERS' EQUITY

Stockholders' equity - GAAP	\$ 169,372

Economic book value	\$ 235,757
Shares outstanding	24,895
Economic book value per share	\$ 9.47

- (1) Management views economic book value, a non-GAAP measure, as a useful and appropriate supplement to GAAP stockholders' equity and book value per share. The measure serves as an additional measure of RCC's value because it facilitates evaluation of RCC without the effects of unrealized losses on investments for which RCC expects to recover full par value at maturity and on interest rate swaps, which RCC intends to hold to maturity, in excess of RCC's value at risk. Unrealized losses recognized in RCC's financial statements, prepared in accordance with GAAP, that are in excess of RCC's maximum value at risk are added back to stockholders' equity in arriving at economic book value. Economic book value should be reviewed in connection with GAAP stockholders' equity as set forth in RCC's consolidated balance sheets, to help analyze RCC's value to investors. Economic book value is defined in various ways throughout the REIT industry. Investors should consider these differences when comparing RCC's economic book value to that of other REITs.
- (2) RCC adds back unrealized losses on interest rate swaps (cash flow hedges) that are associated with fixed-rate loans that have not been adjusted through stockholders' equity for market fluctuations.
