Resource Capital Corp. (NYSE: RSO) ("RCC" or the "Company"), a real estate investment trust whose investment strategy focuses on commercial real estate ("CRE") loan assets, commercial mortgage-backed securities ("CMBS"), and commercial finance assets, reported results for the three and six months ended June 30, 2010.

- Net income for the three and six months ended June 30, 2010 was \$13.4 million, or \$0.30 per share-diluted and \$14.8 million, or \$0.36 per share-diluted, respectively, as compared to net loss for the three and six months ended June 30, 2009 of \$5.1 million, or \$(0.21) per share and \$17.3 million, or \$(0.71) per share, respectively.
- REIT taxable income, a non-GAAP measure, for the three and six months ended June 30, 2010, was \$13.4 million, or \$0.30 per share-diluted, and \$22.7 million, or \$0.55 per share-diluted, respectively, as compared to \$5.3 million, or \$0.21 per share-diluted, and \$11.4 million, or \$0.46 per share-diluted for the three and six months ended June 30, 2009, respectively, increases of \$8.1 million (152%) and \$11.3 million (99%), respectively.
- On June 10, 2010, the Company declared a quarterly distribution of \$0.25 per share of common stock, \$12.8 million in the aggregate, which was paid on July 27, 2010 to stockholders of record on June 30, 2010.
- Book value was \$5.92 per common share as of June 30, 2010.
- During the three months ended June 30, 2010, the Company realized gains of \$2.5 million from the trading of structured notes, a trading venture with Resource Capital Markets, a related party, begun in June 2010, with an initial seed investment of approximately \$5.0 million.
- During the three months ended June 30, 2010, the Company sold for approximately \$1.4 million its interest in a real estate joint venture acquired in 2009 with a cost basis to the Company of \$632,000, resulting in an estimated gain of \$753,000.
- Subsequent to June 30th, the Company agreed to sell two loans, each for approximately 85% of the Company's amortized cost, which sales resulted in an additional \$7.0 million charge to the provision for loan losses for the quarter ended June 30, 2010 (representing 89% of the total of \$7.9 million for the quarter). RCC was motivated to sell these loans, which were a B-note secured by an office building and a mezzanine loan to the owner of a hotel portfolio with a carrying value of \$23.3 million and \$20.0 million, respectively, in order to reduce its exposure to loans other than whole loans. The proceeds for the B-note are included in the CDO cash available for reinvestment (restricted cash as of July 31, 2010 in the liquidity update included in this release). The sale of the mezzanine position is expected to close in August 2010 and will add to CDO cash available for reinvestment upon settlement.
- In a recent development, on July 14, 2010, RCC repurchased \$20.0 million par value of its CDO notes for \$13.8 million, a 31.3% discount to par, for an estimated gain of \$6.3 million, or approximately \$0.12 per share based on outstanding shares as of June 30, 2010.

Jonathan Cohen, CEO and President of Resource Capital Corp., commented, "Our second quarter results reflect our ability to continue to execute on our plan, even in a difficult economic environment. As we recently reported, we are making focused new investments of relatively small amounts in different areas which allows us to pick only the best risk-adjusted investments. As we make new investments, we continue our careful management of our existing portfolios and opportunistically repurchase our debt at discounted prices. We remain on track to distribute \$0.25 per quarter for the rest of this year."

(1) RCC believes that a presentation of estimated REIT taxable income provides useful information to investors regarding its financial condition and results of operations as this measurement is used to determine the amount of dividends that RCC is required to declare to its stockholders in order to maintain its status as a REIT for federal income tax purposes. Since RCC, as a REIT, expects to make distributions based on taxable income, RCC expects that its distributions may at times be more or less than its reported GAAP net income. Total taxable income is the aggregate amount of taxable income generated by RCC and by its domestic and foreign taxable REIT subsidiaries. Estimated REIT taxable income excludes the undistributed taxable income (if any) of RCC's domestic taxable REIT subsidiary, which is not included in REIT taxable income until distributed to RCC. There is no requirement that RCC's domestic taxable REIT subsidiary distribute its income to RCC. Estimated REIT taxable income, however, includes the taxable income of RCC's foreign taxable REIT subsidiaries because RCC generally will be required to recognize and report their taxable income on a current basis. Because not all companies use identical calculations, this presentation of estimated REIT taxable income may not be comparable to other similarly-titled measures of other companies.

(2) U.S. shareholders of controlled foreign corporations are required to include their share of such corporations' income on a current basis; however, losses sustained by such corporations do not offset income of their U.S. shareholders on a current basis.
