- AFFO for the three months and year ended December 31, 2013 was \$17.2 million, or \$0.14 per share-diluted, and \$88.6 million, or \$0.74 per share-diluted, respectively. A reconciliation of GAAP net income to AFFO is set forth in Schedule I of this release.

Included in net (loss) income for the three months and year ended December 31, 2013, was the combined effect of liquidation and deconsolidation of Whitney CLO I and Apidos CLO VIII, respectively. We incurred non-cash charges of approximately \$16.0 million from accelerated amortization of notes issued at discounts and deferred costs for the three months ended December 31, 2013 and \$18.5 million for these same accelerated items for the year ended December 31, 2013.

Jonathan Cohen, CEO and President of Resource Capital Corp., commented, "Our overall 2013 performance was negatively impacted by the faster than anticipated paydown of our corporate loan portfolio. However, we are already putting cash to work in new investments and expect to further increase our investments in commercial real estate loans, middle market corporate loans and other investments. As we do so, we expect Adjusted Funds from Operations to increase throughout 2014. We have a very strong balance sheet, excellent liquidity and access to capital and growing origination platforms that are generating high quality investments with attractive returns."

RECONCILIATION OF GAAP NET INCOME TO FFO and AFFO

(in thousands, except per share data)

(unaudited)

Funds from Operations

We evaluate our performance based on several performance measures, including funds from operations, or FFO, and adjusted funds from operations, or AFFO, in addition to net income. We compute FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts as net income (computed in accordance with GAAP), excluding gains or losses on the sale of depreciable real estate, the cumulative effect of changes in accounting principles, real estate-related depreciation and amortization, and after adjustments for unconsolidated/uncombined partnerships and joint ventures.

AFFO is a computation made by analysts and investors to measure a real estate company's cash flow generated by operations. We calculate AFFO by adding or subtracting from FFO the non-cash impacts of the following: non-cash impairment losses resulting from fair value adjustments on financial instruments, provision for loan losses, equity investment gains and losses, straight-line rental effects, share based compensation, amortization of various deferred items and intangible assets, gains on sales of property that are wholly owned or through a joint venture in addition to the cash impact of capital expenditures that are related to our real estate owned. In addition, we

calculate AFFO by adding and subtracting from FFO the cash impacts of the following: extinguishment of debt, sales of property and capital expenditures.

Management believes that FFO and AFFO are appropriate measures of our operating performance in that they are frequently used by analysts, investors and other parties in the evaluation of REITs. Management uses FFO and AFFO as measures of our operating performance, and believes they are also useful to investors, because they facilitate an understanding of our operating performance after adjustment for certain non-cash items, such as real estate depreciation, share-based compensation and various other items required by GAAP, and capital expenditures, that may not necessarily be indicative of current operating performance and that may not accurately compare our operating performance between periods.

While our calculations of AFFO may differ from the methodology used for calculating AFFO by other REITs and our AFFO may not be comparable to AFFO reported by other REITs, we also believe that FFO and AFFO may provide us and our investors with an additional useful measure to compare our performance with some other REITs. Neither FFO nor AFFO is equivalent to net income or cash generated from operating activities determined in accordance with GAAP. Furthermore FFO and AFFO do not represent amounts available for management's discretionary use because of needed capital replacement or expansion, debt service obligations or other commitments or uncertainties. Neither FFO nor AFFO should be considered as an alternative to GAAP net income as an indicator of our operating performance or as an alternative to cash flow from operating activities as a measure of our liquidity.

The following table reconciles GAAP net income to FFO and AFFO for the periods presented (unaudited) (in thousands, except per share data):
